

WEB DEVELOPMENT

**FINAL PROJECT:
LOCAL FOOD TOURISM GUIDE**

PROBLEM & OBJECTIVE

Tourists visiting Malaysia often face difficulties in discovering authentic local food experiences. Information about Malaysian cuisine is usually scattered across multiple platforms, focuses mainly on popular tourist areas, or lacks cultural context. As a result, travelers may miss out on traditional dishes and local food destinations that represent Malaysia's diverse food culture.

This project aims to address this problem by creating a Local Food Tourism Guide website that centralizes information about Malaysian local food. The website provides clear categorization, visual content, and easy navigation to help users explore regional dishes, street food, and food markets. By offering a user-friendly and informative platform, the website enhances the travel experience and promotes local food as an important part of tourism.

① Finding authentic local food

② Popular places for tourism

③ International visitors

PLANNING PROCESS

- ① Brainstormed the theme of a Local Food Tourism Guide and planned the page structure including Home, Local Foods, Food Places, and Contact pages.
- ② Group roles and responsibilities:
 - Content research and writing – Aqila
 - Website design and layout – Elyssa , xin
 - Image collection and gallery setup – Sky
 - Website development and testing – Royyan

PROBLEM-SOLVING STRATEGIES

①

Challenges

- Large images affected loading speed
- Layout needed adjustment for mobile view
- Keeping the website layout clear and easy to navigate.

②

Popular places for tourism

- Optimized images before uploading
 - Used responsive layout and testing on different devices
 - Used simple navigation and consistent page layout.
